

Hospital Chapel. FAC: 7361

CATCODE: 730774

OPR: AF/HC

OCR: AFMSA/SG8F

Updated August 2024

1.1. **Description.** The hospital chapel is designed to provide chaplain service to patients, visitors, and hospital personnel.

1.2. **Requirements Determination.** Air Force hospital chapel facilities are determined in accordance with *DoD Medical Space Planning Criteria*. An electronic copy of the criteria for hospital chapels can be viewed at <https://www.wbdg.org/ffc/dod/mhs-space-planning-criteria-health-facilities>. Health Facilities Division Planning, Design, Construction (PDC) Branch, AFMSA/SG8F, develops space requirements for all medical facility projects; OASD(HA)/PPMD approves medical facility project scope for medical MILCON and BRAC projects. Contact the appropriate PDC Branch portfolio manager for assistance with medical support facility space planning requirements.

1.3. **Scope Determination.** See the *DoD Medical Space Planning Criteria* and *UFC 4-510-01* <https://www.wbdg.org/ffc/dod/unified-facilities-criteria-ufc/ufc-4-510-01> for additional guidance. *AFI 52-101 (2019)* also provide related guidance. **CATCODES (CC) 730771 – Chapel, Base, CC 730772 – Religious Education Facilities, and CC 730773 – Chapel Center** contain the specific requirements for the other chapel facilities at an installation.

1.4. **Dimensions.** See **paragraph 1.3.**

1.5. **Design Considerations.** Hospital chapel facilities are not counted against the spatial requirements of other installation chapel facilities.
